

## Create a library manager app

### Task Overview

Build a simple and user-friendly web application for managing a library with books and authors. The application should allow users to perform the following operations:

1. Add a new book to the library.
2. View a list of all books.
3. Update details of an existing book.
4. Delete a book from the library.
5. Filter a list of books by title or author.
6. Add a new author.
7. Delete an author and their books
8. Export a list of books.

### Deliverables

Provide a link to a Git repository containing the source code. Include a README file with instructions.
